- No color decay

GV32 Positioning

The BenQ logo is located in the top right corner of the slide. It consists of the word "BenQ" in white, bold, sans-serif font, set against a dark blue, rounded rectangular background.

BenQ GV32 is FHD LED Portable Projector with 18W built-in 2.1 Channel Speakers, 135° projection, Google TV and 95% Rec 709 Color Accuracy (Cinematic Color) for the content streaming lovers who are looking for an immersive Audio-Visual experience, anytime, anywhere.

The GV32 features Google TV, giving users built-in access to Google Play and one-touch access to Google Assistant for all their entertainment needs.

It also comes with official Netflix support.

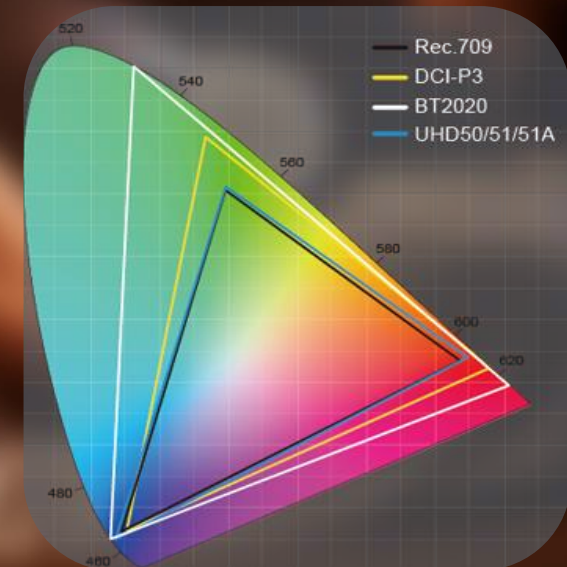

FHD LED Projector with 95% Rec.709 Color Gamut

BenQ

- GV32 can deliver FHD resolution with wider color gamut 95% Rec.709.
- LED light source has higher brightness & contrast than the traditional Lamp, which help to delivers better Color performance.
- FHD resolution delivers more vivid & sharp picture contents.

95% Rec.709

Google TV

- 
- **User Interface** : Google TV offers a more modern and streamlined user interface compared to the traditional Android TV interface. It emphasizes content discovery through personalized recommendations and a user-friendly layout that integrates various streaming services more seamlessly.
 - **Google Assistant Integration**: While both platforms support Google Assistant, Google TV enhances this integration by allowing users to control smart home devices, search for content, and get answers to queries using voice commands directly through the interface.
 - **Cross-Platform Compatibility**: Google TV extends beyond the TV itself, as it is integrated into other Google services and devices, allowing for a more cohesive ecosystem experience if you use other Google products like Nest devices or Google Home.
 - **Ease of Use**: The interface of Google TV is designed to be more intuitive and user-friendly, which can make navigating and finding content simpler, especially for less tech-savvy users.

Auto Focus

Auto Keystone

Obstacle Avoidance

BenQ

Adjust screen with any obstacle on the wall

Clearly fix identifiable edges boundary obstacles

2D Keystone Correction along with Auto screen fit

Advantage:

2D Keystone Correction: Allows to adjust the geometry of the projected image to make it fully rectangular

Auto screen fit

Auto Focus

Benefits:

Simple and Easy Screen setup without wasting much time.

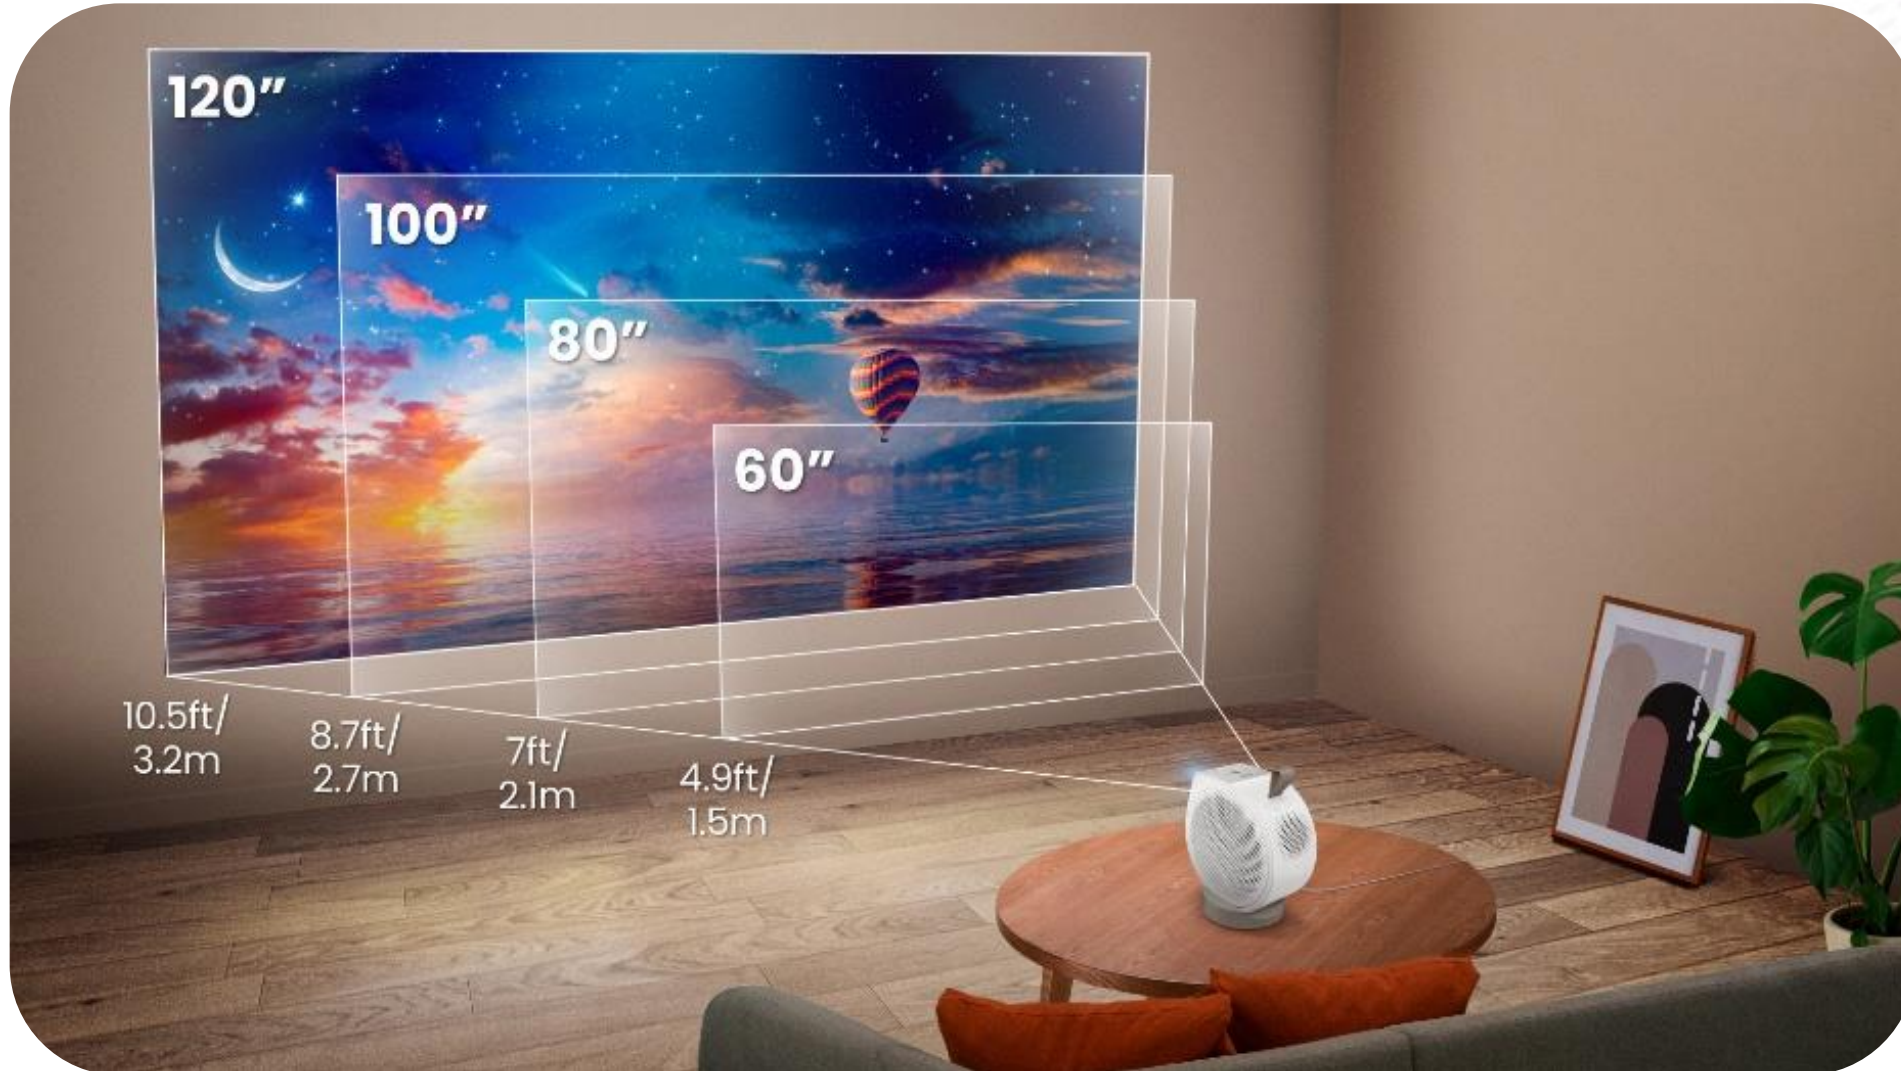

Flexibility to place projector & create a perfect screen from different angle and positions

Benefits Use case:

Home scenario, where there is an obstacle in the clear line of projection.

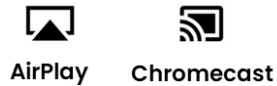

The projector can be placed at a different angle & still can produce a perfect rectangular screen of 30" ~ 120".

Projection Distance

With GV32, you can create your very own personal cinema experience from just eight feet away, with the ability to project screen sizes ranging from 30 to 120 inches.

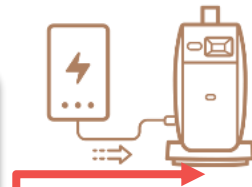

GV32 Connectivity

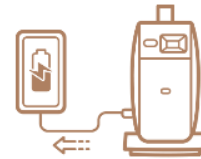

Simply connecting a USB-C cable to GV32 gives you device charging, data transfers, and console connectivity—all in one convenient solution.

And with Airplay and Chromecast support, you can project content directly from your mobile phone.

It has 60W+ Power Bank Support.
Note :- 60-90W power banks support 50% brightness and over 90W enables full brightness.

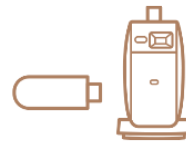

Charge GV32 with a 60W+ power bank

Use GV32 as a power supply (9W output)

* AC power adapter must be plugged in to enable this feature.

Data transfer and media reading

GV32 Speakers

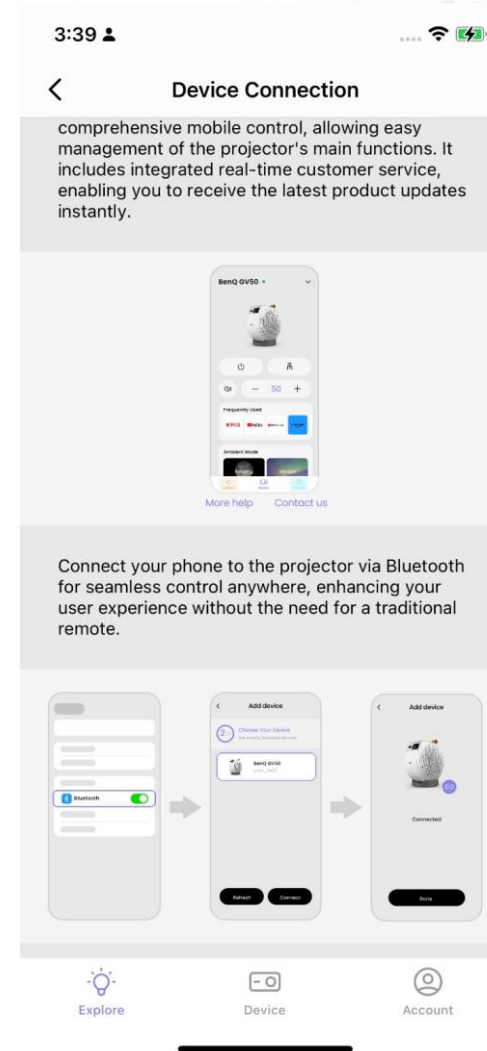

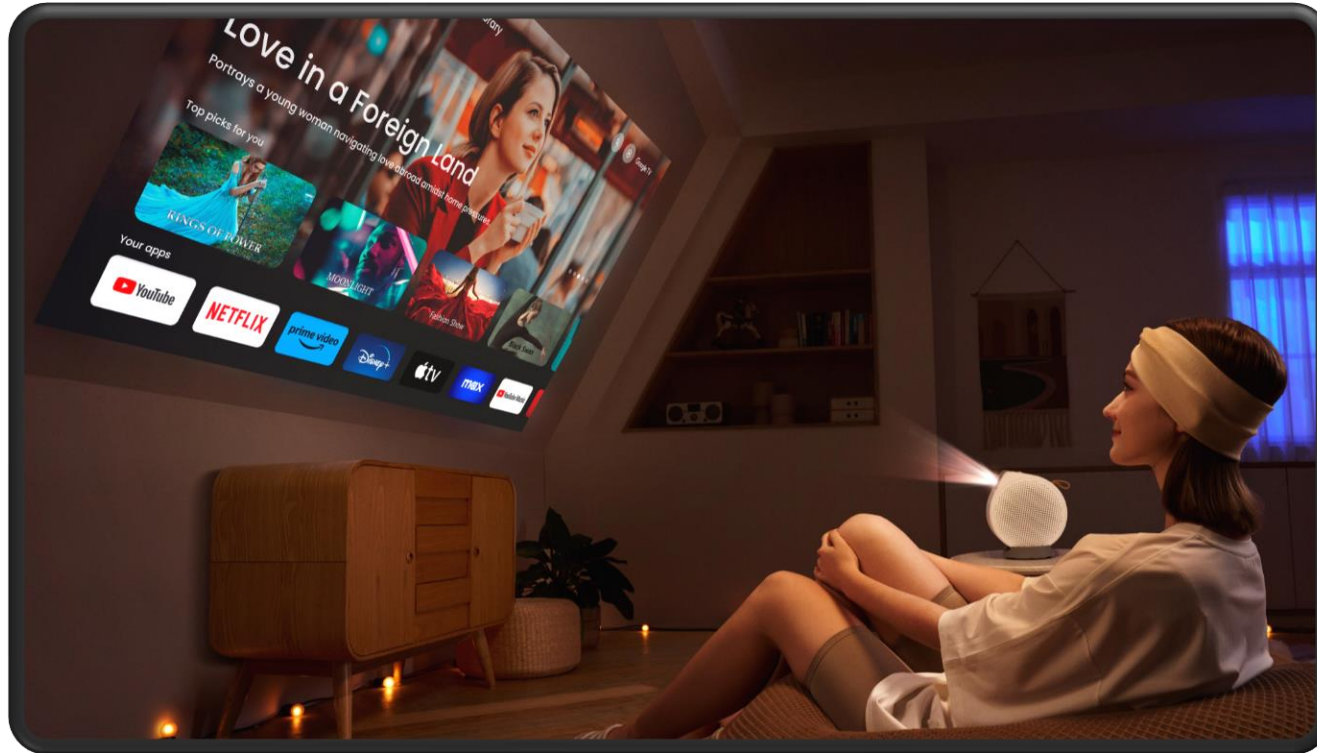

BenQ

Bluetooth Device Connections.

1. Use GV32 as a Bluetooth Speaker.
2. Connect External Bluetooth Speakers / Headphones to GV32

BenQ Smart control App

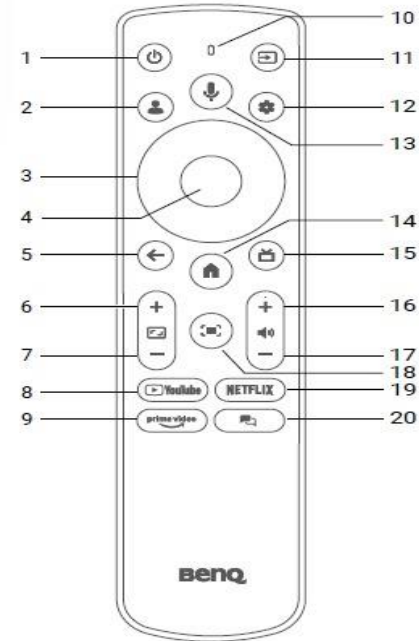

Available now on iPhone Pro or iPad Pro models

BenQ AR Planner works with iPhones and iPads that support ARKit. Requires iOS 11 or later and an A9 chip or newer. For best performance—including LiDAR-based room scanning—we recommend using supported iPhone Pro or iPad Pro models.

Weight	2 Kg
Connectivity	USB-A 2.0 / USB-C / HDMI 2.0b

What kind of power bank does GV32 support?

The portable projector can be charged via USB-C using a power bank or Power Delivery (PD) adapter with 60W or higher output. We recommend power banks with at least 30,000 mAh capacity.

Is the projector drop-resistant?

Yes, GV32 is drop-resistant up to 1.6 ft (50 cm), provided the keypad surface doesn't make contact, avoiding damage to the joystick.

What's the difference between GV50 & GV32 specs?

While both models offer the same 500-lumen brightness, the difference in light source technology leads to distinct performance characteristics:

- GV32 delivers better color performance, ideal for vivid, lifelike visuals.
- GV50 produces deeper blacks and greater visual depth, especially in darker scenes

Warranty Covered

2 Years Carry-In Warranty

The LED light source is also covered by a warranty of **2 years or 2,000 hours whichever is earlier**. Enjoy your projector with confidence and peace of mind, backed by BenQ's commitment to quality and reliability.
